

GRAM

AMBIENCE, FUNCTIONALITY and CLASSIC DESIGN

GRAM is renowned for developing products that give their owners pleasure in everyday life. This is because GRAM concentrates on quality and durability, and focuses on developing functional, environmentally friendly domestic appliances in a classic design. The new M60 range of GRAM refrigerators, freezers and fridge/freezers is no exception.

GOOD REASONS FOR PURCHASING A GRAM

GRAM for the environment

All nine models in the new M60 range belong to the best energy classes, A+ or A. This benefits the environment, and saves you money by reducing your electricity bills. The fact that they are extremely quiet also helps you sleep peacefully.

GRAM for functionality

GRAM refrigerators and freezers are easy to use, from their simple, user-friendly operation via intelligent controls, to their extremely flexible layout, wealth of fittings, and ease of cleaning.

GRAM for classic design

The new M60 range is also a delight to behold. The cabinets are designed with simple clear lines, that fit in almost anywhere, and will continue to do so for many years to come.

KS 290
286-litre refrigerator, 155 cm in height

Energy class **A+**

KS 360
354-litre refrigerator, 185 cm in height

Energy class **A+**

KS 390
388-litre refrigerator, 200 cm in height

Energy class **A+**

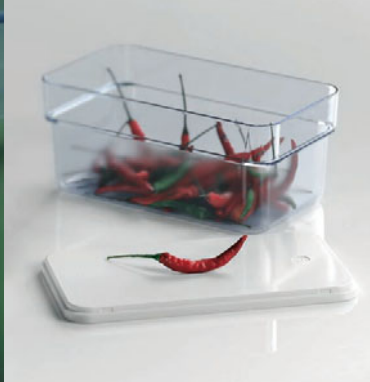

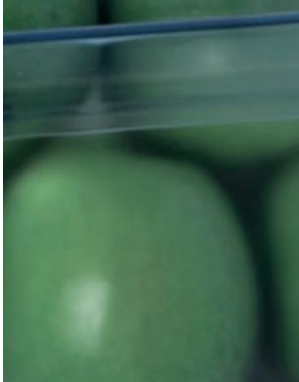

Halogen lighting makes it a pleasure to look into the refrigerator, and all the items of food are highly visible in the well lit cabinet.

The control panel with its intelligent electronic controls is discreetly positioned behind the refrigerator door. It is simply designed and easily operated yet contains many useful functions, including visual and acoustic alarms if the door is left open and the temperature rises.

The door is spacious and flexibly equipped – one of the distinguishing features of GRAM refrigerators. The many multi-boxes and storage shelves can be rearranged to meet your own personal requirements. The shelves are so spacious that there is ample room for large 2-litre cartons to be stored in the door. The elegant door handle runs the entire height of the door making it easy for both adults and children to open a GRAM refrigerator.

The vegetable drawers in the bottom of the cabinet allow fruit and vegetables to be stored separately. They are also ideal for items to be cool stored. The practical grid in the bottom of the drawers ensures that fruit and vegetables are not spoiled by any condensation collecting there. The overlying glass shelf acts as a lid for the vegetable drawers, ensuring that items stored in the drawers remain fresh.

Cleaning the refrigerator is so easy that it is almost a pleasure. Defrosting is fully automatic, and inside surfaces are smooth and maintenance-friendly with simply designed shelf supports. All cabinets have removable rubber sealing strips which are also very easy to clean. It is thus not necessary to replace the entire door should the sealing strip become defective.

KF 310

Fridge/freezer with 178-litre refrigerator and 133-litre freezer, 185 cm in height

Energy class **A+**

KF 320

Fridge/freezer with 226-litre refrigerator and 92-litre freezer, 185 cm in height

Energy class **A+**

KF 350

Fridge/freezer with 238-litre refrigerator and 111-litre freezer, 200 cm in height

Energy class **A+**

Halogen lighting makes it a pleasure to look into the refrigerator section, and all items of food are highly visible in the well lit cabinet.

The control panel with its intelligent electronic controls makes it easy to operate and set the cabinet. Just a single click to control individual functions.

Multi-boxes in several sizes provide many storage possibilities. They can be mounted in the door or stacked inside the cabinet. They can also be put in the freezer. The tight-fitting lids ensure that food stays fresh and protect items from being flavoured by other foods, e.g. onions.

Visual and acoustic alarms provide warning if, for example, the temperature in the cabinet rises or if the door is left open.

Elegant glass shelves allow stored items to be easily seen. The shelves are sturdy, and can be moved, turned or angled. The fridge/freezer arrangement is therefore extremely flexible. Shelves are easily removed for cleaning.

Vegetable drawers allow fruit and vegetables to be stored separately. They provide optimum utilisation of the space available at the bottom of the refrigerator and serve their purpose well. The overlying glass shelf acts as a lid for the drawers, ensuring that items stored in the drawers remain fresh.

FS 230
230-litre freezer, 155 cm in height

Energy class **A**

FS 290
287-litre freezer, 185 cm in height

Energy class **A**

FS 320
315-litre freezer, 200 cm in height

Energy class **A**

The control panel with its intelligent electronic controls is simply designed and easily operated. Just a single click, and you have control of the freezer. On the display, which is discreetly positioned behind the door of the cabinet, it is always possible to see, among other things, the actual temperature in the freezer.

Visual and acoustic alarms warn you when something is wrong with the freezer. And an alarm code displayed on the control panel helps you locate the fault.

Freezer drawers are sturdy and transparent, thus providing an easy overview of stored items. The drawers are easy to pull out and move, and a stopper prevents them from tipping if they are pulled too far out.

A mega drawer also allows you to freeze and store a turkey, other large cuts of meat or a gâteau with ease.

The freezing tray is ideal for quickly freezing loose berries or other items in small portions.

The quick freeze function can be set to run for 24 or 48 hours and switches off automatically. Energy is saved, and you need not remember to switch off the function.
